Race alone or in combination with one or more other races					
Total population	4,485	+/- 497	100.0%	+/- (X)	
White	3,395	+/- 526	75.7%	+/- 7.3	
Black or African American	710	+/- 280	15.8%	+/- 6.2	
American Indian and Alaska Native	42	+/- 46	0.9%	+/- 1	
Asian	451	+/- 236	10.1%	+/- 5.2	
Native Hawaiian and Other Pacific Islander	0	+/- 12	0%	+/- 0.8	
Some other race	10	+/- 20	0.2%	+/- 0.4	
HISPANIC OR LATINO AND RACE					
Total population	4,485	+/- 497	100.0%	+/- (X)	
Hispanic or Latino (of any race)	350	+/- 344	7.8%	+/- 7.2	
Mexican	24	+/- 38	0.5%	+/- 0.9	
Puerto Rican	0	+/- 12	0%	+/- 0.8	
Cuban	19	+/- 34	0.4%	+/- 0.8	
Other Hispanic or Latino	307	+/- 356	6.8%	+/- 7.6	
Not Hispanic or Latino	4,135	+/- 432	92.2%	+/- 7.2	
White alone	2,949	+/- 415	65.8%	+/- 7.8	
Black or African American alone	665	+/- 273	14.8%	+/- 6	
American Indian and Alaska Native alone	0	+/- 12	0%	+/- 0.8	
Asian alone	415	+/- 230	9.3%	+/- 5.1	
Native Hawaiian and Other Pacific Islander alone	0	+/- 12	0%	+/- 0.8	
Some other race alone	0	+/- 12	0%	+/- 0.8	
Two or more races	106	+/- 80	2.4%	+/- 1.8	
Two races including Some other race	0	+/- 12	0%	+/- 0.8	
Two races excluding Some other race, and Three or more races	106	+/- 80	2.4%	+/- 1.8	
Total housing units	2,388	+/- 92	(X)%	+/- (X)	

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see http://www.census.gov/population/hispanic/files/acs08researchnote.pdf.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

DEMOGRAPHIC AND HOUSING ESTIMATES 2009-2013 American Community Survey 5-Year Eastimates

Area Name: Census Tract 4909, Baltimore County, Maryland

Subject	Census Tract 4909, Baltimore County, Maryland			
	Estimate	Estimate Margin	Percent	Percent Margin
		of Error		of Error

Explanation of Symbols:

- 1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
 - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
 - 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 6. An ****** entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
 - 8. An '(X)' means that the estimate is not applicable or not available.
